## Short Biography DJ Freshfluke:

1999, Freshfluke got infected with the DJ-Virus at her friend's place in Cologne. Soon the boyfriend got replaced with two 1210's and a mixer and with a spinning girlfriend she started the **she!planet** on a monthly base in the well-known **Liquid Sky Cologne**.

With three friends she started in the beginning of 2002 the project **Klangkatapult** – till 2004 they organised monthly Parties in different locations and legendary Open Air Venues.

In September 2003 the trained Materials Tester Freshfluke moved to Berlin and started spinning up to three different Open Mic Sessions per week. This built a good connection to many MCs and she is Live DJ for **Massimo** (aka Muerte).

After successful college dropout (she studied media computer science) in march 2004 she began working in the DJ-Line of the music software company **Native Instruments**.

A highlight in 2004 is definitely a 14-days-trip to Sao Paulo (Brasil), where Freshfluke gave DJ-Workshops during a hiphop-project called "**20 anos do hiphop**".

Since the beginning of 2005 Freshfluke is giving DJ-Workshops on a regular basis in cooperation with the **Hiphop Mobil Berlin**, **Native Instruments**, **Kotti e.V.** and **AKM** in different schools and youth centers – an activity which she loves, because it represents her understanding of the "Each one teach one" thought.
